Title: Stressline Introduces Stanton Cast Stone Products

Stressline Limited have long focussed on providing the construction industry with a unique and comprehensive range of structural building products - prestressed concrete flooring and lintels, precast concrete staircases and balconies and a complete range of steel lintels.

On the 18th January 2012 Stressline Limited acquired a range of assets and intellectual property from JP Naylor and Co Limited, a cast stone manufacturer.

This acquisition enables Stressline Limited to expand its product range, and to offer customers a comprehensive range of standard and bespoke cast stone and concrete products, alongside its existing range of structural building products.

For the first time, customers are now able to specify and to have scheduled structural building products, together with architectural products from the same manufacturer. These items can be delivered on the same vehicle, with plot details if required, simplifying the supply chain for both buyers and site managers.

This range of architectural cast stone and concrete is called - Stanton Cast Stone.

For further information and enquiries please contact the sales team on 01455 272457 or email sales@stressline.net.
